Subject: [BoatAnchors] Panel Meters Needed
Message-ID: <5F561968.1020109@kk5im.com>

I find myself short a couple of 3 1/2" panel meters to finish a new Transmitter project.

Need two of either of these types-- Westinghouse NX-35 or General Electric DO-41 in 30-50 mA and 300mA.
One is whiteface and the other is blackface. Would like to keep them the same.

Thanks!

Jay,

Have a look at Fair Radio Sales meter offerings at https://fairradio.com/panel-meters-gauges-and-shunts/dc-milliamps/ . They have a "GONOGO" meter listed that has a 1 ma dc movement, is 3.5" round and mounts in a 2.75" hole. They are unused and sell for $8. You could easily put a shunt on them to put them into the ranges you require, and you could put a piece of paper on the existing cards to make the face calibration anything you like.

Jim, W8KGI

Subject: [BoatAnchors] Help with RAS Coil Box
Message-ID: <27a5c905-a021-7926-11bf-b8b8a914656c@ix.netcom.com>

Morning.
I'm trying to help a member with an RAS coil box.
Someone stripped off all the tags and the door latch.

If you're a "hardware guy,"? perhaps you can help
I'm trying to find a latch, but I don't know what it's called.
For example:? the kind that has a handle you lift up to
release a curved piece engaged with the other half is
called a "toggle latch."? One with a U-shaped wire that
engages the second piece is a "draw catch."

Here's a photo of what we need.? It's the part above the knob:
https://tinyurl.com/y384wuo3

The top part has a knob that slides up to unlatch from the
bottom part.?? What do we call this thing?

TNX OM DE Dave AB5S

P.S. If you have any RAS tags to donate to the cause,
many thanks.

Johnson Viking II:
I would like to fuse the primary for the LV transformer.
Anyone done this?? Recommended fuse value?
Thanks.

I'd recommend measuring the AC line current while transmitting AM, multiplying that by 1.5, and using that value of slow blow fuse. That last is important to avid turn-on surge problems.

Fregards,

Scott Robinson

And an inrush limiter (NTC thermistor) allows you to fuse much closer to expected values without having to deal with as much "nuisance" fuse blowing. I use these cheap and simple devices in a lot of my vintage gear. List member Jim Garland W8ZR published an excellent article in Electric Radio about how to properly use these devices.

Message-ID: <e69a7acb-6c4a-537c-c936-6ae1a78ad41e@ix.netcom.com>

A few years ago, I found a "forestry" radio marked
with a BLM identifier and a tag saying it had done
service in Alaska.? It is a Northern Radio Company
of Seattle, WA type 450, model B.

There was not information on the net about so
I started tracing and poking around until I figured-out
it was a six-channel xtal-controlled HF portable
designed to run 25 W out screen-modulated AM
from at least 3 to 9 MC.? Solid state
except for a 6CL6 driving a 6146.? Runs on 12 VDC.
Got it running and it's a sweet little talker.
Photos at this link:

https://goo.gl/photos/dmpa7cY3ddwfAUXc9

I'm hoping that, after these last few years, some
info on it might have surfaced.? Anyone?

Dave and other Johnson owners.

Johnson used fused line cord plugs on equipment back then.

A FUSED LINE CORD PLUG CAN MAKE YOUR WIFE INTO A WIDOW.

I saved Dave's Diatribe for later thorough study. However it immediately brought to mind the Elephant Poop in the Room:

NEMA 15 plugs and receptacles are not really so smart. If anything has a

higher failure rate than them it's a well kept secret. Reversed Line and Neutral (plus) short to chassis (minus) Protective Earth Continuity (equals) one new Widow. If you don't know the state of your premises wiring I hope your will is up to date.

 ??? I looked up the NEMA 15 plug/socket to see what it was. What
I found was a plethora of NEMA connetions. See
<https://en.wikipedia.org/wiki/NEMA_connector#NEMA_15>
 ??? No wonder there is so much confusion.

Yes, confusion about the incidence of improperly installed and poorly
maintained premises wiring.

Arden

    I looked up the NEMA 15 plug/socket to see what it was. What
I found was a plethora of NEMA connetions. See
<https://en.wikipedia.org/wiki/NEMA_connector#NEMA_15>
     No wonder there is so much confusion.

SURE!!! Now you taunt me with the NCX-3!!

Did your original mssg contain a Globe Star CB set? Had one in collge. Does this one worrk? I think it had 8 or 12 channels (all Xtals)

And there's more:

National NCX-3 transceiver #1
National NCX-3 transceiver #2
National AC power supply for NCX-3
National NC-183
National NC-183D
National NC-300
Multi-Elmac AF-67 with power supply
R-366/TRR5 receiver
RBL-3/CWQ-46161-A receiver

See terms and conditions below (the stuff's gotta go!)

Boatanchor shoppers;

I'm cleaning out my storage unit. It doesn't make sense to keep this stuff anymore. This is the first lot, more to come. You can have any of these items for pennies a pound. Or free if you're destitute. Pick up in the SF Bay area or pay for shipping.

Swan 260 transceiver
Swan 270B transceiver #1
Swan 270B transceiver #2
Swan 117XC power supply
Globe Star AC operated CB transceiver (nice)
Eico 720 transmitter
Johnson Viking II #1
Johnson Viking II #2 (some cabinet damage)
EH Scott SLR-F
Heathkit DX-100
Tektronix 547 #1
Tektronix 547 #2
Tektronix 545B
Tektronix 575
Boonton 250A RX meter

If you are interested in any item let me know. Thanks.

The Globe Star was working fine years ago when I got it. I didn't use it much because the xtals were not the local channel freqs. I went for a bargain table 23 channel solid state rig. We mostly played trivial pursuit and lightened the day for some truckers. I'll check the Globe Star out if you are interested in it.

Just did a Google on the Globe Star.....It only has 5 chnls.....yeah, sure.....if you wouldn't mind, pls check it out and let me know if it is working. That has a built in AC supply. Mic included??

I have located an Eico 722 VFO for the 723. Pete at ManualMan has the book on it and the VFO. LIttle pricey but his work is excellent and he provides me with an extra fold out schematic upon my request so I can mark it up as I troubleshoot (if necessary).

Just did a Google on the Globe Star.....It only has 5 chnls.....yeah, sure.....if you wouldn't mind, pls check it out and let me know if it is working. That has a built in AC supply. Mic included??

I have located an Eico 722 VFO for the 723. Pete at ManualMan has the book on it and the VFO. LIttle pricey but his work is excellent and he provides me with an extra fold out schematic upon my request so I can mark it up as I troubleshoot (if necessary).

The Globe Star was working fine years ago when I got it. I didn't use it much because the xtals were not the local channel freqs. I went for a bargain table 23 channel solid state rig. We mostly played trivial pursuit and lightened the day for some truckers. I'll check the Globe Star out if you are interested in it.

SURE!!! Now you taunt me with the NCX-3!!

Did your original mssg contain a Globe Star CB set? Had one in collge. Does this one worrk? I think it had 8 or 12 channels (all Xtals)

And there's more:

National NCX-3 transceiver #1
National NCX-3 transceiver #2
National AC power supply for NCX-3
National NC-183
National NC-183D
National NC-300
Multi-Elmac AF-67 with power supply
R-366/TRR5 receiver
RBL-3/CWQ-46161-A receiver

See terms and conditions below (the stuff's gotta go!)

Boatanchor shoppers;

I'm cleaning out my storage unit. It doesn't make sense to keep this stuff anymore. This is the first lot, more to come. You can have any of these items for pennies a pound. Or free if you're destitute. Pick up in the SF Bay area or pay for shipping.

Swan 260 transceiver
Swan 270B transceiver #1
Swan 270B transceiver #2
Swan 117XC power supply
Globe Star AC operated CB transceiver (nice)
Eico 720 transmitter
Johnson Viking II #1
Johnson Viking II #2 (some cabinet damage)
EH Scott SLR-F
Heathkit DX-100
Tektronix 547 #1
Tektronix 547 #2
Tektronix 545B
Tektronix 575
Boonton 250A RX meter

If you are interested in any item let me know. Thanks.

Arden

Hi Ronnie,

Didn't get an e-mail from you. Eico is spoken for. Swan 117XC is available. Pick up in SF Bay Area or ship? What's your address?

Arden

Subject: [BoatAnchors] When You Can't Get an IF Can
Message-ID: <e2b4084c-d059-bffc-19f7-2c8cb4e0fbae@ix.netcom.com>

Good Morning.
Theoretical situation-
You have an IF transformer with an open primary.
For whatever reason, you cannot get a replacement
or suitable substitute.? Some of you will recognize
this diagram:

https://photos.app.goo.gl/qtLG7oEEP73Lg7Yt6

Possible solution:
Use a 455 KC Ceramic Resonator-

https://photos.app.goo.gl/SbYwxAEzubXCkGU27

The 10 Ohm resistor is because that was the DC
resistance of the secondary winding.

Thoughts?

It?s worth a try, what have you got to lose? You?ll probably need to
increase the 10 ohm resistor to give the resonator a better load.

73, Morris

The problem I see is the impedance mismatches and voltage overdrive.
Ceramic filters are designed for solid state applications with much lower
input and output impedances in the few hundreds of ohms. If you can't fix
the coil by removing it and unwinding a few turns or even scramble winding a
new coil, then use one tank in the can connected like in your schematic.
The 10 ohm resistor is unnecessary.

Arden

To be precise, using one tank in the can connected as the original output tank and the plate RFC capacitively couple to the tank. Thanks, Morris, for mentioning the 10 ohm resistor value being way too small.

And there's more:

National NCX-3 transceiver #1
National NCX-3 transceiver #2
National AC power supply for NCX-3
National NC-183
National NC-183D
National NC-300
Multi-Elmac AF-67 with power supply
R-366/TRR5 receiver
RBL-3/CWQ-46161-A receiver

See terms and conditions below (the stuff's gotta go!)

Boatanchor shoppers;

I'm cleaning out my storage unit. It doesn't make sense to keep this stuff anymore. This is the first lot, more to come. You can have any of these items for pennies a pound. Or free if you're destitute. Pick up in the SF Bay area or pay for shipping.

Swan 260 transceiver
Swan 270B transceiver #1
Swan 270B transceiver #2
Swan 117XC power supply
Globe Star AC operated CB transceiver (nice)
Eico 720 transmitter
Johnson Viking II #1
Johnson Viking II #2 (some cabinet damage)
EH Scott SLR-F
Heathkit DX-100
Tektronix 547 #1

Tektronix 547 #2
Tektronix 545B
Tektronix 575
Boonton 250A RX meter

If you are interested in any item let me know. Thanks.

Arden
